

LFP204 Quick-installation Peristaltic Pumps

Product materials:

Housing: PC、PA66

Roller: Nylon+MoS₂

Product Features:

- | **Powerful torque;**
- | **Customized flow, up to 650ml/min;**
- | **2 rollers;**
- | **Inner diameter reaches up to 6.4mm;**
- | **Pump's housing is convenient for disassembly and assembly ,which makes it convenient for tube replacement;**
- | **DC motor and stepper motor are both available (revolutions setting controller is standard configuration , flow can be adjustable). The stepper motor satisfies the requirement of long term usage with low noise;**
- | **3 colors (skyblue, colorless transparent and yellow) available for the Pump's housing. Random delivery will be made if no request for the colors.**

Model Selection Guide:

- | **Intermittent operation, strict cost control and no requirements of the flow accuracy, please choose DC motor;**

To be noticed: keep low speed on the condition of continuous operation (within 150rpm).

LFP204 Quick-installation Peristaltic Pumps

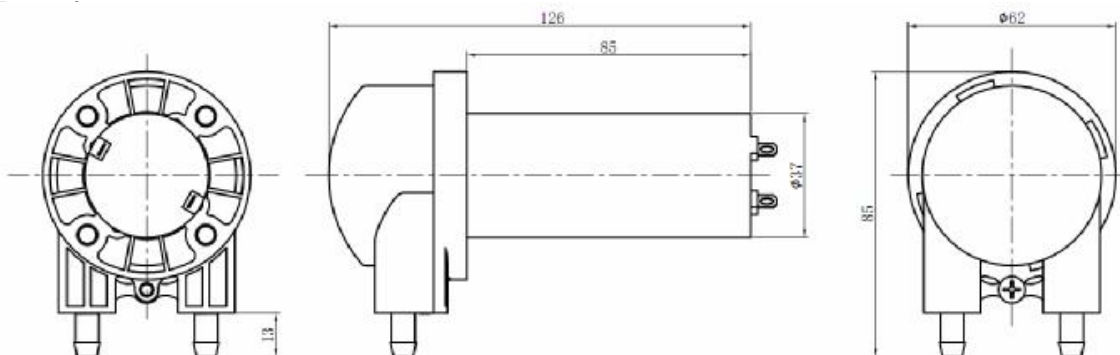

Product Parameter

Model	LFP204 (DC motor)
Speed range (rpm)	25、 50、 100、 150、 200 、 300
Tube size	Tube thickness: 1.6 mm, inner diameter: 3.2、 4.8、 6.4 mm 16# 、 25#、 17#
Flow range(ml/min)	8-500 ml/min
Roller quantity	2 rollers
Motor power(W)	6-16W
Motor model	37 series DC electric motor
Operation voltage(V)	12、 24
Product weight(Kg)	0.4

204 Specification (ml/min, media: water)

Inner diameter X thickness	3×1	16#	25#	15#	17#	24#
Rotate speed (rpm)						
25	8	9	31	28	55	61
30	11	10	38	36	70	73
50	25	17	65	63	135	125
60	30	20	73	71	145	150
100	55	35	125	123	250	245
150	60	45	193	189	400	380
200	110	70	253	245	500	490
